

VDI Policies

Following are the general policies related to Virtual Desktop Infrastructure (VDI) implemented at IGCAR and is applicable to all the users of VDI.

- As per the centralized policy, the concerned official has to return the thin client systems to Computer Division on situations like user is not able to use it, user requirement is over, user transfer and user retirement.
- We are taking daily backup of 'H' drive i.e. user data with a retention period of 1 week. However, we cannot ensure data retrieval for all the requests due to technical implications.
- There is no backup for 'C' drive data and applications. Users are advised to take backup of their important C drive data (like application data, mailbox if it's residing in C drive) at frequent intervals.
